- Use of highly trained IT experts.
- High level of Integrity and code of Ethics.
- Excellent customer service and regular follow ups.

Our Services

1. ICT STRATEGY AND PLANNING SERVICES

The growing importance of technology has demanded that organizations develop an IT strategy. IT executives have to build their own functional plans to support business strategy. An effective IT strategy only begins with an IT-informed business strategy.

Strategic planning in IT sets up the company to achieve its objectives, maximize value and gain competitive advantage. This plan must outline technology-based business management procedures that organizations can use to guide its operations. It serves as a guide to IT-related decision making, with IT tasks prioritized and implemented using the plan as a framework.

Philan Technologies works with clients to develop IT strategies that are valuable and help businesses achieve their objectives.

Our Services

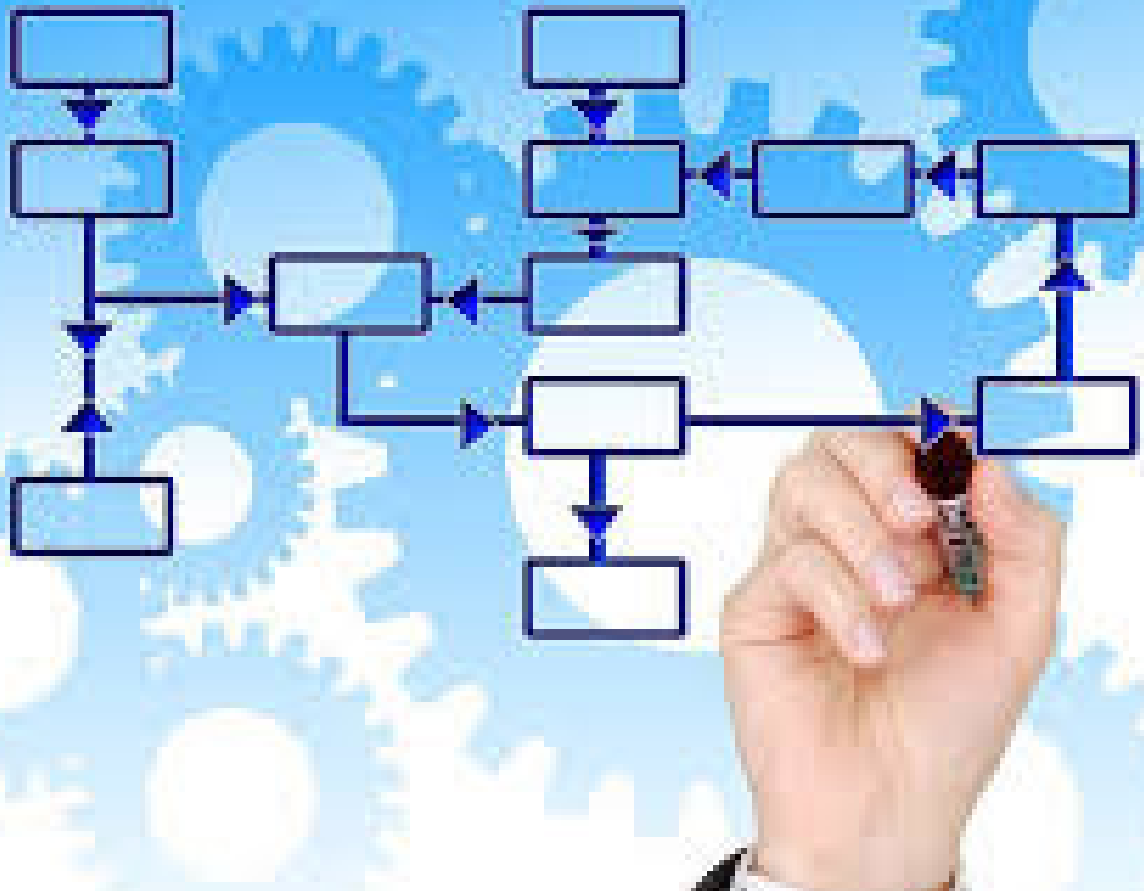

2. ERP/BUSINESS SYSTEMS IMPLEMENTATION QUALITY ASSURANCE SERVICES

Organizations across the world are continuously making heavy investments in ERPs either for the first time or further upgrading and updating. Some are acquiring new business systems altogether, buying new modules of the same systems, enhancing existing systems modules or reconfiguring existing systems. In each case huge financial investments are involved.

At Philan Technologies, we apply our tested and proven methodology to assist our clients in ensuring that:

1. All contracting documents and blueprints have been prepared and signed off.
2. All the project objectives are understood, documented and are fully achieved.
3. Project risks are understood, documented and are fully mitigated.
4. Financial budgets are reasonable and adequate to complete the projects.
5. The time allocation is reasonable to achieve the desired goals.
6. All the relevant business owners and stakeholders are involved.
7. All resources have been well planned and organized for harmonious service delivery.
8. All project documents have been completed and the project signed off.

Our Services

3. BUSINESS PROCESS RE-ENGINEERING (BPR)

With Philan Technologies as your preferred business partner, we work with you in cutting down enterprise costs and process redundancies.

We work with you to restructure unproductive management layers, wipe out redundancies, and remodel processes differently.

When embraced, BPR will turn around a failing or stagnating company, increasing the profits and driving growth.

4. IT INFRASTRUCTURE MANAGEMENT

Philan Technologies offers a wide range of infrastructure services that include:

- Backup Solutions
- Data Centre solutions
- Physical Security Solutions
- Network Solutions
- Sale and maintenance of end Point Devices

Our Services

5. ONLINE SERVICES

We also offer a wide variety of online services:

1. Website Development
2. Cloud Services
 - Platform as a Service (PaaS)
 - Software as a Service (SaaS)
 - Infrastructure as a Service (IaaS)
3. Domain Registration & Web hosting
4. Registration and Training Services

Our Services

6. DEVELOPMENT AND TESTING OF BUSINESS CONTINUITY (BCP) AND DISASTER RECOVERY PLANS (DRP)

Every year, management of companies report that they are not confident in their organization's ability to recover following a disaster.

An excellent business continuity and disaster recovery planning can and should be integrated with your day-to-day operations.

Philan Technologies collaborates with Information and Cyber Security experts to deliver sound and robust recovery and continuity plans.

7. CYBERSECURITY / IT SECURITY

The digitization of business has exposed organizations to vulnerabilities like cyber-attacks and data breaches which are costing businesses yearly hence the importance to develop security controls and measures that limit exposure.

It is therefore necessary for organizations to develop an effective cyber security program encompassing policies that include risk management coupled with regulatory and audit compliance, along with disaster recovery and continuity planning.

Philan Technologies assists clients in developing and implementing strategies that give insight into security breaches and data protection strategies to ensure that your security policy and operations support your strategic objectives. These strategies will ensure proactive security controls, compliance readiness, consistent testing and improvement and continuous security assurance.

8. DATA CONSULTING SERVICES

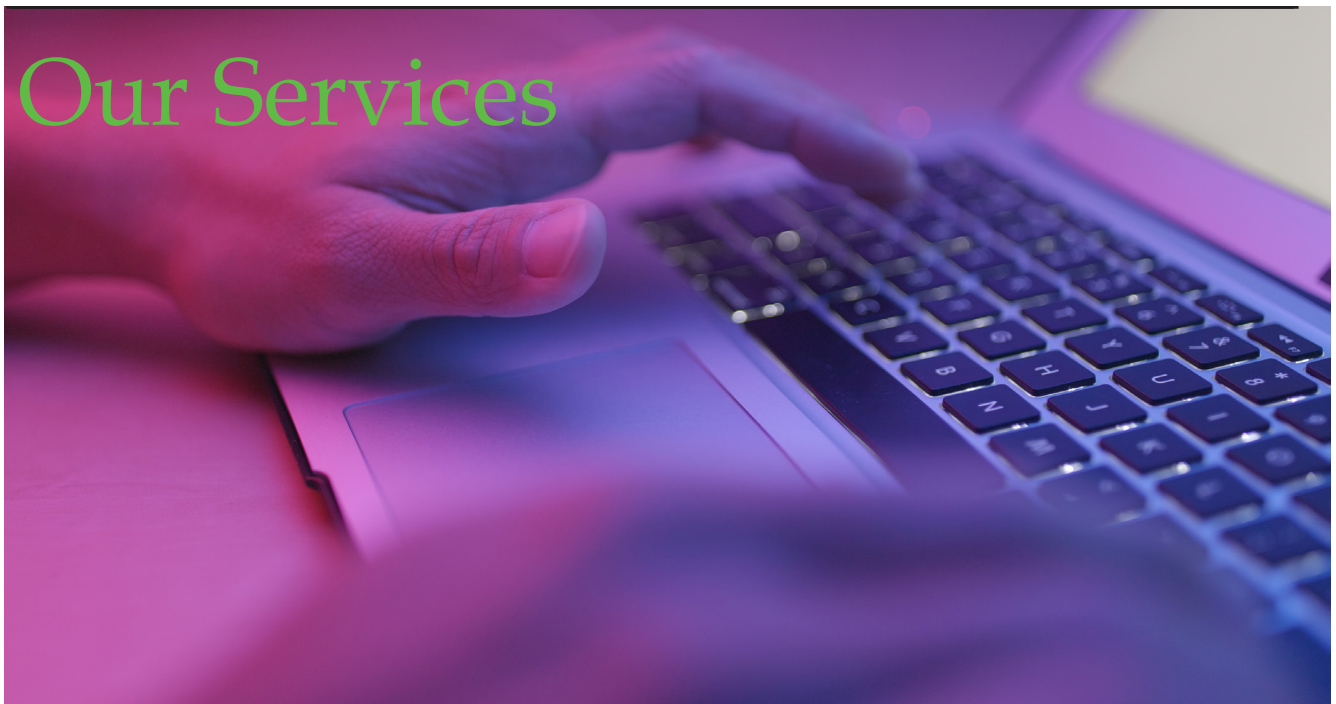

Organizations in the Private and the Public Sector continue to face huge challenges on data management. Business Intelligence, Strategy Formulations, Fraud Management, Risk Management, Cost Management, Financial Reporting and all other business activities heavily rely on data for correct decisions to be made.

The way data is obtained, processed, stored, controlled, accessed, retrieved and applied can determine whether an organization achieves its objectives or fails in delivering its functions.

Philan Technologies works with clients across various industry segments to deliver data consulting services that make business owners, managers, employees, auditors, customers, suppliers, regulators and other stakeholders satisfied.

Specifically, we help our clients to:

- Analyze databases and ensure data security
- Identify critical data analytics for business intelligence for organizational planning
- Develop data analytics to run continuously from system databases and provide valuable insight for business auditing and monitoring
- Create reusable data analytics using leading data analysis tools for risk management in various operational aspects of businesses.
- Deploy specific data analytics for fraud management, Fraud Detection, Fraud Investigation and Fraud Prevention Purposes.

9. ICT AUDITS

Organizations have automated most operations making ICT a key component to the achievement of their objectives which makes Information Systems and Infrastructure, a critical component for organizations today.

ICT must therefore be fully aligned to the firm's objectives and must address key areas of focus including Mapping of Business Objectives to technology, Risk Management, Business Process Controls, Asset protection, Revenue Management, Expenditure Controls, Regulatory Compliance, Governance as well as Fraud Management.

Philan Technologies conducts comprehensive ICT audits and advises clients on what controls to put in place to ensure all business objectives are achieved through efficient and effective utilization of ICT resources. Philan Technologies ICT Audit is comprehensive and covers the following areas:

- Alignment of ICT investment to the overall business strategy
- ICT Management suitability to deliver the corporate ICT and business agenda
- All ICT Infrastructure
- ICT Security
- Business Systems and Applications
- Disaster Recovery
- Business Continuity
- Penetration testing and Cyber Security Services

Philan Technologies works with client organization to ensure the alignment of ICT and business objectives to risks managed and goals achieved.

Our Services

10. ICT RISK MANAGEMENT SERVICES

Many organizations are undergoing rapid growth and thus investing in large and complex information systems, new technologies and structures which present them with new opportunities and threats.

This makes it necessary for organizations to mitigate the risks associated with the IT infrastructure they are investing and install control measures.

At Philan Technologies , we realize the need for organizations to keep pace with new technology and exploit the colossal opportunities these innovations offer. However, we are also mindful of the risks they expose an organization to and the need for management to control those risks.

This is why our IT experts, who have years of experience in delivering IT services, are committed to assisting you identify and manage these risks for you to meet your financial goals.

11. ICT RETAIL SERVICES

We also supply, deliver and maintain the following:

- All kinds of computers and laptops
- Computer and networking accessories
- Repair and upgrade of computers, printers, ups and laptops
- Office stationery and equipment.
- Printers, Ups
